Final Task - English I

Subject: English I	**Task:** Final Oral & Written Task
Participant: Damián Tristant	**Role:** Junior Developer Candidate
Target Level: CEFR A1+ (IT Professional)	**Date:** October 2026

ORAL PRESENTATION SCRIPT (CANDIDATE MONOLOGUE)

Part 1: Self-Introduction

Good morning, teacher and classmates. Today, I am going to introduce myself and present my profile as a developer. My name is Damián Tristant. I am 40 years old and I live in Buenos Aires, Argentina. I am currently studying Programming at UTN. I am very organized, responsible, and passionate about software development and technology.

Part 2: Work Role, Tasks, and Routines

I work as a Junior Software Developer. Every day, I start work at 9 AM. First, I attend the Daily Scrum meeting with my team to report progress. Then, I write clean code, review pull requests, and fix bugs. I work closely with other software developers, a Product Owner, and a Scrum Master. I usually finish my work at 5 PM.

Part 3: Simple Fictional Project

Now, I want to describe a recent project I worked on. It is a web application for an online store:

- **Objectives:** The main goal was to build a product management system with user authentication and a functional shopping cart.
- **Tools & Technologies:** We used HTML, CSS, TypeScript, Node.js, and MongoDB for database management.
- **My Specific Tasks:** I created the user login module, built database queries, and tested the REST APIs using Postman.

TEACHER'S QUESTIONS & ANSWERS SECTION

Teacher's Question 1: How do you handle blockers or difficult bugs during a sprint?

Damián's Answer: When I have a blocker, like a database connection error, I first analyze the server logs. Then, I report the issue during the Daily Scrum meeting or ask a senior developer for help.

Teacher's Question 2: Why are you interested in this position, and what are your career goals?

Damián's Answer: I read great things about this company, and I am excited for this opportunity. My main goal is to improve my backend development skills, learn new modern frameworks, and grow as a professional developer.

Teacher's Question 3: How often do you fix bugs or update code?

Damián's Answer: I fix bugs and perform code reviews almost every day to ensure the application works properly.

Key Speaking & Pronunciation Guide

- **Daily Scrum:** Pronounce as */déili skram/*.
- **Blocker / Bugs:** */blóker/* (impedimento) y */bags/* (errores de código).
- **Authentication:** Pronounce as */o-then-ti-kéi-shon/*.
- **Fluency Tip:** Present your monologue smoothly, make short natural pauses at full stops, and avoid reading word for word.
